

FTP Connectivity

Establishing new connectivity Effective Date 2/20/09

Enhancing existing permissions or changing password Effective Date _____

Pushing Files Pulling Files Both

Per a request, we have established IPA_H6M with an FTP site specific to test in order to transfer files securely with WellCare Health Plans. The site may be utilized with any of the following:

- Secure transfers via the internet at <https://edi.wellcare.com> (Where files may be manually uploaded and downloaded. The web interface also provides a user guide should you have any questions or concerns).
- Utilizing an FTP software with Secure FTP over port 21 (all flavors) at edi.wellcare.com or IP 67.98.172.110
- Utilizing an FTP software with SFTP/SSH/SCP over port 22 at edi.wellcare.com or IP 67.98.172.110

TEST

If testing is required by your provider representatives, all testing will be conducted via "Test" folder on the site. Within that folder are subfolders entitled:

- **To_WellCare** All files that you send to us during testing will be in the Test/"To_WellCare" folder
- **From_WellCare**. All files we send to IPA_H6M for test will be in the Test/"From_WellCare"

PRODUCTION

There are three folders on the site utilized for production:

- **To_WellCare** folder location where claims files will be sent from IPA_BPN
- **From_WellCare** folder location where files will be sent from WellCare

Username: IPA_H6M

Password will be sent separately only to you for security reasons.

Please note that files will remain on the FTP site for 30 days. Should you need them longer than those time frames please ensure that they are saved to your system. WellCare maintains a copy on our secure server in the event that files need to be reposted. Additionally, inactivity to the site of one year will result in the account be deactivated and subsequently deleted from our server.

Should you have any further questions please contact Susan Keyser at 813 290 6200 X3568 or via email at susan.keyser@wellcare.com or itoperations@wellcare.com
