∞ Target and Alternative medications listed may not have the same mechanism of action and may simply be first line therapies for that condition. Wellcare encourages use of generics as first-line therapy; however, these are suggestions that may not be clinically appropriate for all members. These recommendations are based on the HPMS approved formulary file submission ID 22379 (version 10).

Abbreviations: ER = extended-release, DR = Delayed-release, LA = long-acting, SL = sublingual, ODT = orally disintegrating tablets, NS = nasal spray, NF = non-formulary

GC = Gap Coverage - We provide additional coverage of this prescription drug in the coverage gap.

§ = Fluoxetine Capsules 10mg & 20mg only
