

WELLCARE HEALTH PLANS SUPPORTS MOTHERS!

**OUR GOAL IS TO UPHOLD BETTER HEALTH
OUTCOMES FOR MOTHERS AND THEIR BABIES.**

WellCare gratefully acknowledges the efforts of the WIC program; to save lives and, improve the health of nutritionally at-risk women, infants, and children. The merits of the collaboration between WIC and WellCare Health Plans of New Jersey is evident when achieving specific health objectives for our members. WellCare is committed to the improvement of mother and childhood health.

New and expecting mothers enrolled in WellCare are eligible to receive a breast pump. WellCare will cover the purchase of one (1) standard electric breast pump per pregnancy. Generally, a physical referral or prescription is required. Coverage can be obtained from our suppliers, Aeroflow or Integra Partners. The authorization reassures that the member has a viable pregnancy and in ensures quality monitoring via the claim process.

To assist WellCare members with obtaining a breast pump, please reference the list of contacts provided: Aeroflow, Integra Partners and WellCare Health Plans Key Contacts.

In addition to breast pump coverage, WellCare runs a Prenatal Program and Prenatal Rewards Program. Please refer WellCare members to Member Services for more information at 1-888-453-2534. TTY users may call 711.

WellCare hopes to continue partnering with WIC towards helping mothers get all the support they need to use the pump successfully.
