HEDIS® MY 2023 Quick Reference Guide

Updated to reflect NCQA HEDIS® MY 2023 Technical Specifications

Wellcare strives to provide quality healthcare to our membership as measured through HEDIS® quality metrics. We created the HEDIS® MY 2023 Quick Reference Guide to help you increase your practice's HEDIS® rates and address care opportunities for your patients. Please always follow the state and/or CMS billing guidance and ensure the HEDIS® codes are covered prior to submission.

What is HEDIS®?

HEDIS® (Healthcare Effectiveness Data and Information Set) is a set of standardized performance measures developed by the National Committee for Quality Assurance (NCQA) to objectively measure, report, and compare quality across health plans. NCQA develops HEDIS® measures through a committee represented by purchasers, consumers, health plans, health care providers, and policy makers.

What are the scores used for?

As state and federal governments move toward a quality-driven healthcare industry, HEDIS® rates are becoming more important for both health plans and individual providers. State purchasers of healthcare use aggregated HEDIS® rates to evaluate health insurance companies' efforts to improve preventive health outreach for members.

Physician-specific scores are also used to measure your practice's preventive care efforts. Your practice's HEDIS® score determines your rates for physician incentive programs that pay you an increased premium — for example Pay For Performance or Quality Bonus Funds.

How are rates calculated?

HEDIS® rates can be calculated in two ways: administrative data or hybrid data. Administrative data consists of claim or encounter data submitted to the health plan. Hybrid data consists of both administrative data and a sample of medical record data. Hybrid data requires review of a random sample of member medical records to abstract data for services rendered but that were not reported to the health plan through claims/encounter data. Accurate and timely claim/encounter data reduces the need for medical record review. If services are not billed or not billed accurately, they are not included in the calculation.

How can I improve my HEDIS® scores?

- ✓ Submit claim/encounter data for each and every service rendered
- ✓ Make sure that chart documentation reflects all services billed
- ✓ Bill (or report by encounter submission) for all delivered services, regardless of contract status
- ✓ Ensure that all claim/encounter data is submitted in an accurate and timely manner
- ✓ Include CPT II codes to provide additional details and reduce medical record requests
- ✓ Respond timely to medical records requests
- ✓ Submit supplemental data throughout the measurement year
- ✓ Early Engagement with Pharmacy Adherence is key – once a member loses days on a prescription, those days cannot be recovered.
- ✓ Speak with the members about any barriers to adherence.
- ✓ Consider utilizing RxEffect – a free online portal for our network providers that will prioritize your high-risk patients more efficiently. This will save on resources as it lists your patients at highest risk for non-adherence.
- ✓ If you have any questions regarding pharmacy and member barriers, please reach out to your local Provider Relations Representative for assistance.

One or more comprehensive well-care visits with a PCP or OB/GYN within the measurement year. Visits occurring anytime in the measurement year, including prior to or after the patient's birthday, closes the gap.

(W30) Well-Child Visits in the First 30 Months of Life:

Children who had the following number of well-child visits with PCP during the last 15 months.

(W30/WCV) Well-Child and Adolescent Well-Care Visits *(continued)*

Lines of Business: ● Commercial (Marketplace)

Tips:

- Remind caregivers of appointments by texts or phone calls.
- Educate the caregiver about the importance of preventive care visits.
- Consider using templates with checkboxes to ensure required information is documented.
- Submit applicable codes.

The following rates are reported:

- 1 Well-Child Visits in the First 15 Months.** Children who turned 15 months old during the measurement year: Six or more well-child visits.
- 2 Well-Child Visits for Age 15 Months–30 Months.** Children who turned 30 months old during the measurement year: Two or more well-child visits.

(AMR) Asthma Medication Ratio

Lines of Business: ● Commercial (Marketplace)

Measure evaluates the percentage of members 5-64 years of age who were identified as having persistent asthma and had a ratio of controller medications to total asthma medication of 0.50 or greater.

Step 1: For each member, count the units of asthma controller medications (Asthma Controller Medications List) dispensed during the measurement year.

Step 2: For each member, count the units of asthma reliever medications (Asthma Reliever Medications List) dispensed during the measurement year.

- ✓ For each member, sum the units calculated in step 1 and step 2 to determine units of total asthma medications
- ✓ For each member, calculate ratio using the below:
 - Units of Controller Medications/Units of Total Asthma Medications

(UOP) Use of Opioids from Multiple Providers

Lines of Business: ● Medicare

Assesses the percentage of members 18 years and older, receiving prescription opioids for ≥15 days during the measurement year, who received opioids from multiple providers.

Three rates reported:

- 1 Multiple Prescribers-** The percentage of members receiving prescriptions for opioids from four or more different prescribers during the measurement year.
- 2 Multiple Pharmacies-** The percentage of members receiving prescriptions for opioids from four or more different pharmacies during the measurement year.
- 3 Multiple Prescribers and Multiple Pharmacies-** The percentage of members receiving prescriptions for opioids from four or more different prescribers **and** four or more different pharmacies during the measurement year (i.e., the percentage of members who are numerator compliant for both the Multiple Prescribers and Multiple Pharmacies rates).

Note: A lower rate indicates better performance for all three rates.
