Improving Access to Contraception

Beyond the Pill's newly updated and FREE online training "Improving Access to the Full Range of Contraceptive Methods, Including IUDs & Implants" is an excellent primer on IUDs and the contraceptive implant and discusses how to integrate them into your clinic services to help patients access the full range of contraceptive methods. The training is designed for all types of health care providers and support staff. This 90-minute course is self-paced and interactive.

Each section features real-world providers who guide learners through all steps of offering IUDs and implants, as part of offering the full range of contraceptive options, to their patients.
