

# HEDIS® Guide

## Pediatric Quick Tips

**Submit** consistent, detailed claims to help reduce medical record review in your offices. Include all existing conditions on the claim, at the time of each visit. Every time you see a member is an opportunity for preventive care as well as sick care.

**Schedule** regular checkups and/or blood work for members who are on long-term medications.

**Assess** member compliance/adherence to long-term medication therapy (i.e., asthma medications).

**Document** all procedures done by other physicians with a date and result.

### All Well Visits must include:

- Health history
- Two developmental histories (physical and mental)
- A comprehensive unclothed physical exam: measurements, height/weight, head circumference, general appearance, head/neck/eyes/ears, cardiovascular, respiratory, gastrointestinal, neurological evaluation, reproductive system and breast, musculoskeletal, lymphatic system, integument, speech patterns, orientation and mental alertness, parent and child interaction/behavior.
- Health education/anticipatory guidance: oral health, infant care, parent interaction, injury/illness prevention and community resources.

**Well-Child Visits (0–15 months):** Children should be seen 6+ times on or before their 15-month birthday, which falls in the measurement year.

**CPT Code:** Ages 0–12 months – 99381, 99391, 99461  
Ages 1–4 – 99382, 99392

**ICD-10-CM:** Ages 0–12 months – Z00.110, Z00.111, Z00.121, Z00.129, Z00.8
