

What is it? Information for PCPs on how to use the screening reminders in the monthly membership list (MML) to help stay in compliance with Medicare and Medicaid requirements.

The Monthly Membership List (MML).....for your convenience:

Compared to years past, it is now easier for PCPs and their office staffs to ensure that all your 'Ohana patients are up-to-date for screenings and other services mandated by Medicare or Medicaid requirements. Every month when you receive your MML listing all of our members for whom you are the PCP, be sure to look at the column at the far right of the page. This is where you will see if our records indicate that any of your 'Ohana patients is overdue for any of the following:

Abbreviation	Definition
ASTHMA	Has a diagnosis of asthma and should be seen every 3 months
ASTH MEDS	Has a diagnosis of asthma but has not been prescribed long-term drug therapy specific to persistent asthma (if applicable)
CHECK UP	Is overdue for a check up
Chlamydia Screen	On contraceptives and may need screening
CV LDL-C	Was hospitalized in the last year for AMI, CABG or PTCA, and will need a follow-up LDL-C test
DM Eye	Has diabetes but there is no record of a dilated eye exam in the last year
DM HgbA1c	Has diabetes but there is no record of HgbA1c test in the last year
DM HgbA1c ABN	Has diabetes and had a HgbA1c result greater than 7
DM LDL-C	Has diabetes but there is no record of an LDL-C test in the last year
DM LDL-C ABN	Has diabetes but the LDL-C result was greater than 100
DM UA	Has diabetes but there is no record of a urine test for microalbumin in the last year
HBP	Is on antihypertensive medication and should be seen every 3 months
IMMUN	May be overdue for immunizations
LDL-C ABN	Has an LDL-C greater than 130; treat appropriately
MAMMO	Has not had a screening mammogram in the last year
PAP	Has not had a screening PAP smear in the last year
